The self-propelled Verti-Drain® 7007 can be used either as a sit-on aerator, or as a walk in front. The highly maneuverable Verti-Drain® 7007 can quickly and easily treat hard to reach areas. The unit deep aerates and cores down to 6" deep, which is deeper than any other walk-behind or sit-on aerator.

# VERTI-DRAIN

Verti-Drains adjustable parallelogram design shatters the soil, and also allows for clean Coring, on all models.

The 7007 is a concept in deep tine aeration from Redexim Charterhouse. This new Verti-Drain® has the walk in front versatility and maneuverability for the superintendent that only uses pedestrian machines on his greens. The 7007 also incorporates the convenience of ride-on ability to get you quickly to the next green.

## WORKING SPECIFICATIONS
