## **seppi m.® Your Reliable Partner**

Founded in 1939 by Max Seppi and specializing in the manufacture of mulching mowers since 1971, SEPPi M. is now one of the foremost manufacturers in its sector - not only in Italy, but throughout the world.

Since its early days SEPPi's motto has been to help farmers improve their work with innovative yet easy to handle and highly efficient equipment. Today SEPPi M. is committed to offer only the best equipment, whether for agriculture, forestry, greenspace maintenance or for the energy and construction industry.

Decades of experience and tireless research for continuously improving technologies and materials guarantee products of the highest quality which will provide unrivaled service even in difficult conditions.

Discover the advantages offered by the equipment of SEPPi M.!

# FLAIL MULCHING MOWERS

agricultural attachments for tractors up to 95 HP

## Vineyards, orchards, meadows, pasture land ...

to mulch grass, branches and prunings up to a 3, 5 or 7 cm (1.2" - 2" - 2.8")

For over 40 years our flail mulching mowers have been working successfully in professional agriculture and greenspace maintenance. They are tough and reliable attachments with long durability and high performance. Low wear and easy maintenance guarantee an extraordinary result allowing the user to save time and money.

A great choice of optional and accessory equipment makes it possible to customize the machine according to your professional needs.

### This is why SEPPi mulchers stand for quality !

- > working speed up to 10 km/h (6 mph)
- > working widths from 85 to 275 cm (33 - 108 inches)
- > mechanical or hydraulic, linear or parallel linkage side shift
- > belt drive and gearbox with freewheel
- > strong support roller, adjustable in height
- > adjustable hood with rubber protection
- > front protection with metal flaps or chains
- > rotors with wide choice of hammers or knives

# FLAIL MULCHING MOWERS

agricultural attachments for tractors up to 200 HP

## Agricultural land, roadsides, grassland, pastureland, woods ...

to mulch grass, prunings and brush up to 5, 7 or 11 cm (2" - 2.8" - 4.3")

In the most varied situations, SEPPi M. mulching mowers satisfy the needs of professionals in greenspace maintenance – guaranteeing a fast and precise cut!

For large surfaces SEPPi M. offers combined machines with working widths up to 7 m (276 inches).

### This is why SEPPi mulchers stand for quality !

- > working speed up to 10 km/h (6 mph)
- > working widths from 175 to 700 cm (69 - 275 inches)
- > mechanical or hydraulic, linear or parallel linkage side shift
- > reinforced belt drive and gearbox with freewheel  
(on request with hydraulic transmission)
- > very strong support roller, adjustable in height
- > adjustable hood with rubber protection
- > front protection with metal flaps or chains
- > rotors with choice of different hammers and knives

# OFFSETTING MULCHING MOWERS

attachments for tractors up to 160 HP

## Greenspace maintenance on slopes ...

To mulch grass and brush up to 5, 7 and 12 cm (2" - 2.8" - 4.7")

Ideal for greenspace maintenance, road-sides, river banks, ditches and power lines. Used frequently in orchard and vineyard applications.

Hydraulic angling and side shift make these machines very versatile.

### This is why SEPPI mulchers stand for quality !

- > working speed up to 3 - 7 km/h (2 - 4.5 mph)
- > working widths from 95 to 275 cm (37 - 108 inches)
- > hydr. linear or parallel linkage side shift
- > hydraulic vertical angling from -65° to +90°
- > anti-shock device
- > belt drive
- > very strong support roller, adjustable in height
- > adjustable hood with rubber protection
- > front protection with metal flaps or chains
- > rotors with wide choice of knives and (forestry) hammers

# FORESTRY MULCHERS

for tractors up to 500 HP

## MIDIFORST DT

## Forests, wasteland, greenspace maintenance...

mulches branches, brush, wood and stumps and fells trees up to 60 cm (23") Ø

SEPPi M. forestry mulchers are ideal for greenspace and forest maintenance, to create firebreaks, to clear the site after wood harvest, and for maintenance of roadsides, power, gas and other rights of way.

### This is why SEPPi mulchers stand for quality !

- > working speed 0 - 5 km/h (up to 3 mph)
- > working widths from 125 to 300 cm (49 - 118 inches)
- > ISO 3-point front or rear linkage
- > belt drive
- > PTO shaft self-aligning system
- > support skids, adjustable in height
- > hydraulically adjustable hood, with chain protection
- > front and rear protection with double/ triple chains
- > rotors with wide choice of fixed knives or swinging hammers
- > wide choice of options for different tasks

# STUMP & ROOT GRINDERS

attachments for tractors and excavators

# Stumps, roots, tree rows ...

to grind stumps and roots to depth

SEPPi M. stump grinders are strong and efficient machines to grind stumps (any diameter) up to 50 cm (20 inches) deep. They grind wood and mulch the fibers finely, spreading the material on the ground and mixing it into the soil, where it will decompose easily and become precious humus.

The STAR-FC, not only grinds wood but also crushes stones up to 15 cm (6") diameter. The stump grinders may be attached to agricultural tractors or to excavators.

## This is why SEPPi mulchers stand for quality !

- > working widths from 10 to 100 cm (4 - 40 inches)
- > ISO 3-point linkage or excavator interface plate
- > the mechanical KASTOR works with hydraulic pivoting from left to right (110 cm / 43 inches radius). The hydraulic model, mounted on an excavator has no limit of action.
- > belt drive, mechanical or hydraulic with motor of choice
- > in-depth skids on FC models
- > hydraulically adjustable hood
- > protection with double
- > different types of rotor with fixed (stump grinding) knives
- > wide choice of options for varying tasks

# STONE CRUSHERS & SOIL TILLERS

outstanding performance and robust construction

## Gravel roads, debris, agricultural land, woods ...

to grind stones up to 50 cm (20")

There are a wide variety of different applications for these stone crushers and soil tillers:

- > crush stones on surfaces and roads
- > create and maintain gravel roads
- > grind building rubble on construction sites
- > reclaim land for agricultural use
- > improve arable fields and other land
- > prepare the soil for re-planting
- > clear forests after harvesting wood

### This is why SEPPi mulchers stand for quality !

- > crush stones up to 50 cm (20 inches) in diameter
- > mulch wood up to 50 cm (20 inches) in diameter
- > work up to 40 cm (16 inches) depth
- > working speed 0 - 2 km/h (0 - 1,2 mph)
- > working widths from 125 to 250 cm (49 - 98 inches)
- > ISO 3-point linkage
- > belt drive or transmission with spur gear motor
- > hydraulically adjustable hood
- > protection with chains
- > options: hydraulic compacting roller or adjustable grader blade
- > rotor with a choice of different hammers with tungsten carbide

# EXCAVATOR MULCHERS

attachments for excavators 2 – 35 t

BMS

## Greenspace maintenance, preparation ...

to mulch grass, brush and wood from 5 to 40 cm (2 - 16 inches), according to the model

Ideal for clearing uncultivated areas, river banks, clearing power and pipe lines, and general site preparation.

In forestry, particularly useful to mulch debris after harvest.

Ideal to reduce accumulated and piled green waste.

### This is why SEPPi mulchers stand for quality !

- > hydraulic drive: motors and belts to suit application
- > working widths from 60 to 200 cm (24 - 79 inches)
- > prepared for excavator mounting with proper interface
- > support roller and support skids, adjustable in height
- > protection with chains
- > rotors with wide choice of hammers and knives
- > wide choice of optional equipment (hydraulic motors, hydr. rotation plate, mechanical float adaptor...)

# HYDRAULIC DRIVE MULCHERS

attachments for hydraulic tractors and loaders

# Greenspace maintenance, forestry, agriculture - for hydr. tractors & loaders

to mulch grass, branches and wood from 5 to 50 cm (2 - 20 inches)

SEMPI M. mulchers with hydraulic drive are ideal for forest clearing and cleanup after harvest, the maintenance of roadsides, power and pipe lines and other rights of way, and for general greenspace maintenance.

These mulchers are particularly helpful to prevent fires and to clear the ground after storms and calamities.

## This is why SEMPI mulchers stand for quality !

- > hydraulic motors and belts to suit carrier and application
- > working widths from 150 to 250 cm (60 to 98 inches)
- > working speed 0 - 5 km/h (0 - 3 mph)
- > skid steer linkage (SAE), ISO 3-point linkage  
or universal interface plate
- > support skids, adjustable in height
- > front and rear protection with chains
- > rotors with wide choice of hammers and knives
- > wide choice of optional equipment (motors to suit application, guard frame, interface etc.)

# BOOM MOUNTED MULCHING MOWERS

attachments for tractors from 67 to 150 HP

## Greenspace maintenance with wide choice of mulching heads

to mulch grass and brush up to 10 cm (4"), according to the mulching head

The new generation of boom mounted mulching heads by SEPPI M., with exceptional features, have been designed to leave a perfect cut in any situation.

The robust construction of the boom makes it possible to attach forestry mulching heads.

Whether you are clearing roadsides, river and creek banks or along fence lines, you've made the right choice with SEPPI M. boom mulchers!

### This is why SEPPI mulchers stand for quality !

- > booms from 500 to 650 cm (197 - 256 inches)
- > in combination with the mulching heads H-SML and H-SMWA-K with different rotors, hammers and knives
- > working widths from 105 to 175 cm (41 - 69 inches)
- > cat. 2 & 3 ISO 3-point rear rear linkage with stabilizers
- > independent hydraulic system and oil cooler
- > hydraulic pumps and closed circuit piston motors
- > hydraulic breakaway
- > EHS system to adapt to the contours of the ground automatically

# MULCHERS WITH CHUTE FOR BIOMASS

attachments for tractors from 40 to 150 HP

## Agricultural shredders and universal forestry mulchers ... to collect biomass

to mulch and collect biomass (grass, prunings or wood )up to 15 cm (6") Ø

The ideal solution to mulch and collect mulched grass, branches and wood for biomass or simply to clear the ground, in agriculture, forestry or in garden and landscaping.

Hydraulically operated, adjustable chute directs material to collection trailer.

### This is why SEPPI mulchers stand for quality !

- > working widths from 150 to 200 cm
- > high discharge chute for material collection
- > hydraulically adjustable conveyor belt
- > ISO 3-point link rear linkage
- > trailer hook
- > belt transmission
- > support roller, adjustable in height
- > rear hood with rakes
- > special rotor with combined hammers and knives
- > efficient chain protection against material thrown out

SMO DRAGO

MIDIFORST  
DRAGO

# PICK-UP SHREDDERS

for tractors up to 180 HP

## Get rid of piled up prunings

no need to remove prunings, simply shred them finely and they will decompose quickly, directly on the soil

Mechanical solution to get rid of accumulated prunings in high piles: shredders with a pick-up kit for material feed and fine mulching grid.

For olive, citrus, almond and other nut cultivations, we recommend the MINIFORST pick-up:

- available with 1 or 2 pick-up feed rotors
- available with agricultural or forestry rotor

The MINIFORST pick-up is 2 machines in 1:  
1) forestry mulcher for conventional use  
2) pick-up mulcher, with feed rotors for piled up prunings

## This is why SEPPI mulchers stand for quality !

- > to mulch grass, wood or piled up prunings from 5 to 25 cm (2 - 10"), according to the chosen model and configuration
- > working speed 0 - 5 km/h (0 - 3 mph)
- > working widths from 100 to 250 cm
- > lower feeding kit with fine mulching grid
- > belt drive
- > special rotors with different tools

SMO PICK-UP

MINIFORST  
PICK-UP

# ROTARY MOWERS

for tractors up to 90 HP

# Orchards, vineyards and greenspace maintenance ...

to mulch grass and weeds

The low profile of these rotary mowers make them ideal to work beneath the canopy of fruit trees and in vineyards. A precise cut and an even distribution of mulch are results that will provide satisfaction.

The SEPPi M. rotary mowers are designed to facilitate the job of professionals in agriculture, gardening and landscaping.

## This is why SEPPi mulchers stand for quality !

- > working speed 6 - 9 km/h (3.7 - 5.6 mph)
- > working widths from 135 to 360 cm (35 - 142 inches), adjustable models available
- > hydraulic parallel linkage side shift
- > designed to minimize interior grass accumulation
- > belt transmission
- > support rollers adjustable to set the height and width of cut
- > wide choice of optional equipment
- > rotating knives

## ACCESSORIES FOR UNDER CANOPY

to fit the tractor or to fit the mulcher

# Under canopy maintenance in orchards and vineyards

not only for organic farming - easy to change, modular accessory equipment

A healthy orchard requires a good orchard floor. The use of SEPPI M. under canopy accessory equipment helps achieve this goal, and often allows for reduced use of pesticides.

Models:

**XSC** = rotary mower

**XSA** = cultivator

**XSP** = shoot remover

**XAN** = sweeper

**XTR** = conveyor belt for side discharge

**XID** = herbicide spraying system

**XID**

**X-FAST™**: carrier construction with quick coupling system for connecting a device to the required module

**PORT-X**: 3-point-linkage with independent hydraulic system, including side shifting and X-FAST™

# MULCHING EQUIPMENT SPECIALIST

for over 40 years !

It was in 1971 that Luciano Seppi developed his first mulching mower with a flail rotor. This innovation changed the practices in contemporary agriculture. A few years later the first machines were supplied to Germany, the USA and Australia. Since then SEPPI mulchers have been exported around the world! Today they work in about 70 countries.

In 1980 Luciano Seppi developed the first forestry rotor.

In 1989 SEPPI M. was again a pioneer, developing the first excavator mulcher on the market.

- 1) first flail mulching mower in 1971 with elegant design of the times
- 2) first forestry mulcher in 1980
- 3) first excavator mulcher ever in 1989 in Canada
- 4) Luciano Seppi: already passionate about farm machinery as a teenager
- 5) SEPPI mulchers shown for the first time at EIMA 1974

Professional Mulchers for those looking for outstanding performance and robust construction.

You can find videos of SEPPi mulchers at work on our website: [www.seppi.com](http://www.seppi.com) and [www.youtube.com/seppimulcher](http://www.youtube.com/seppimulcher).
