MULCHING EQUIPMENT SPECIALISTS

Quality by Design

PICK-UP MULCHER

MINIFORST PICK-UP
80-110 HP

HANDLING PRUNINGS

Certain crops produce very high quantities of prunings. This can cause big problems when it is time to mulch them. Burning is often illegal and is always bad for the environment. The Miniforst Pick-Up Mulcher provides a perfect solution – picking up the prunings with a pick up reel at ground level and, if needed, reinforcing the feed into the machine with an optional top reel. The prunings are then processed within a screen to produce a fine and uniform mulch.

You don't need to remove prunings anymore. When you use a SEPMI pick-up mulcher it will be mulched finely, through a fine mulching grid. This results in a fast biodegradation, within one season.

The **MINIFORST pick-up** is particularly suitable for olive, citrus, walnut and almond cultivations and stony conditions

- the machine is fast
- it collects and mulches finely 100% of the prunings in one single pass
- long hammer lifetime;
- prunings are lifted from the ground and processed through a screen; therefore no contact between the hammers and stones.

ROTOR AND HAMMERS

different versions available

SMO flails
standard

swinging hammer
OPT 240

swinging hammer with tips
OPT 193

MINIFORST
classic forestry version
without pick-up device
55 - 90 HP required at the PTO
mulches wood up to 12 cm [4,7"] Ø

Tough mulcher with pick-up device for material feed and screen, to obtain a fine and uniform mulch.

Manage large quantities of prunings easily.

The MINIFORST pick-up is particularly suitable for cultivations with very thick and bulky wood, like olive and citrus.

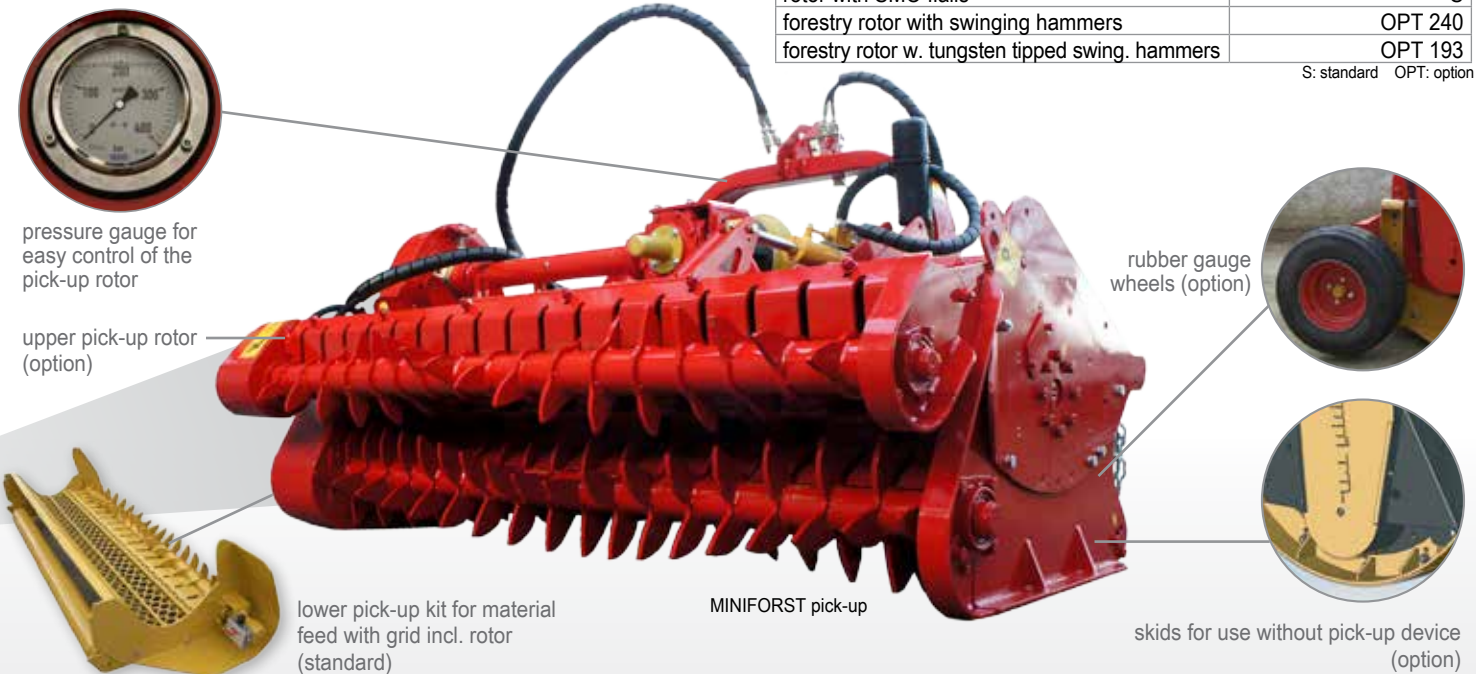

The kit is assembled and disassembled in a short time by one man.

2 machines in 1:

- 1) forestry mulcher to mulch grass, brush and wood up to 12 cm [4,7"] in diameter, for conventional use
- 2) pick-up mulcher, with power feed to mulch dense rows of prunings up to 25 cm [10"] in diameter

features	MINIFORST pick-up
mulches wood up to	25 cm Ø
working speed	0-5 km/h
rear central fixed ISO 3-point linkage	cat. 2 for pushed machine only
front attachment	OPT 101
gearbox with freewheel and through shaft	540 rpm OPT 018: 1000 rpm
input shaft	1"3/8 Z=6
pick-up kit for material feed with grid incl. rotor	S
skids (for use without pick-up device)	OPT 045
upper pick-up rotor	OPT 223
hydraulic hood	S
skids and support roller	S
rubber gauge wheels	OPT 035
front and rear protection	chains
rotor with SMO flails	S
forestry rotor with swinging hammers	OPT 240
forestry rotor w. tungsten tipped swing. hammers	OPT 193

* The weight of the machine is approximate, it refers to the standard version without any options and it may vary.
 ** The indicated kW and HP refer to the power required at the PTO output shaft, not to the nominal tractor power.

The Advantage of High Quality

Mulching Equipment Pioneers

Founded in 1939 by Max Seppi, SEPPi M. is now one of the foremost manufacturer in its sector - not only in Europe, but worldwide. A pioneer like no other, SEPPi has been manufacturing mulching equipment for more than 40 years. SEPPi's mission is "To improve the professional's work through innovative and efficient solutions".

The many years of experience, together with the tireless research for more advanced technologies and more resistant materials result in the premium quality of the SEPPi equipment with tough machines that are reliable even under extreme working conditions.

The biggest gratification over the past 70 years has been our satisfied customers, who have benefitted from long and efficient work with the SEPPi equipment – a continuous motivation to keep on focusing on high quality! The family-based character of the company today being led by the third generation, stands for fair and responsible business relationships.

Discover the many advantages of owning SEPPi equipment!
